

## Substitution

Log4E replaces `System.out.println`, `System.out.print`, `System.err.println`, `System.err.print` and `e.printStackTrace` statements.

In the Preferences you can choose which logger level should be used.

Options:

- Replace `System.out`

If unchecked, the replacement of `System.out`'s will be omitted.

- Replace `System.out` with logger level

Choose the level of logger.

- Replace `System.err`

If unchecked, the replacement of `System.err`'s will be omitted.

- Replace `System.err` with logger level

Choose the level of logger.

- Replace `e.printStackTrace()`

If unchecked, the replacement of `e.printStackTrace()`'s will be omitted.

- Replace `e.printStackTrace()` with logger level

This setting is the same as Catch Block settings and is not configurable here.
